Trademarks -

- Sysmac and SYSMAC are trademarks or registered trademarks of OMRON Corporation in Japan and other countries for OMRON factory automation products.
- · Windows, Windows 98, Windows XP, Windows Vista, and Windows 7 are registered trademarks of Microsoft Corporation in the USA and other countries.
- EtherCAT® is registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.
- Safety over EtherCAT® is registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.
- ODVA, CIP, CompoNet, DeviceNet, and EtherNet/IP are trademarks of ODVA.
- The SD and SDHC logos are trademarks of SD-3C, LLC.

Other company names and product names in this document are the trademarks or registered trademarks of their respective companies.

Introduction

Thank you for purchasing a NX-series.

This manual lists data that is required to configure systems, such as the power consumptions and weights of the NX Units that configure Slave Terminals.

Use this manual when considering the Unit configuration of Slave Terminals on paper.

Keep this manual in a safe place where it will be available for reference during operation.

Intended Audience

This manual is intended for the following personnel, who must also have knowledge of electrical systems (an electrical engineer or the equivalent).

- Personnel in charge of introducing FA systems.
- · Personnel in charge of designing FA systems.
- · Personnel in charge of installing and maintaining FA systems.
- · Personnel in charge of managing FA systems and facilities.

For programming, this manual is intended for personnel who understand the programming language specifications in international standard IEC 61131-3 or Japanese standard JIS B 3503.

Applicable Products

This manual covers the following product.

NX-series

Communications Coupler Units EtherCAT Coupler Unit Digital I/O Units Analog I/O Units Position Interface Units System Units Safety Control Units

Relevant Manuals

To use the NX-series, you must refer to the manuals for all related products.

Read all of the manuals that are relevant to your system configuration and application before you use the NX-series.

Most operations are performed from the Sysmac Studio Automation Software. Refer to the *Sysmac Studio Version 1 Operation Manual* (Cat. No. W504) for information on the Sysmac Studio.

Manual Structure

Page Structure and Icons

The following page structure and icons are used in this manual.

Note This illustration is provided only as a sample. It may not literally appear in this manual.

Special Information

Special information in this manual is classified as follows:

Precautions for Safe Use

Precautions on what to do and what not to do to ensure safe usage of the product.

Precautions for Correct Use

Precautions on what to do and what not to do to ensure proper operation and performance.

Additional Information

Additional information to read as required.

This information is provided to increase understanding or make operation easier.

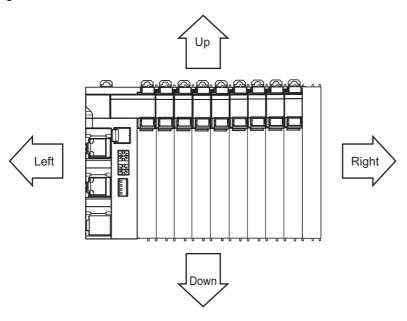

Version Information

Information on differences in specifications and functionality for CPU Units and Communications Coupler Units with different unit versions and for different versions of the Sysmac Studio is given.

Note References are provided to more detailed or related information.

Precaution on Terminology

- In this manual, "download" refers to transferring data from the Sysmac Studio to the physical Controller and "upload" refers to transferring data from the physical Controller to the Sysmac Studio.
 For the Sysmac Studio, synchronization is used to both upload and download data. Here, "synchronize" means to automatically compare the data for the Sysmac Studio on the computer with the data in the physical Controller and transfer the data in the direction that is specified by the user.
- In this manual, the directions in relation to the Units are given in the following figure, which shows upright installation.

Terms and Conditions Agreement

Warranty, Limitations of Liability

Warranties

Exclusive Warranty

Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

Limitations

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right.

Buyer Remedy

Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Application Considerations

Suitability of Use

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Disclaimers

Performance Data

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Safety Precautions

Refer to the user's manual of the Unit to be used for safety precautions.

Precautions for Safe Use

Refer to the user's manual of the Unit to be used for precautions for safe use.

Precautions for Correct Use

Refer to the user's manual of the Unit to be used for precautions for correct use.

Regulations and Standards

Refer to the user's manual of the Unit to be used for precautions for information on regulations and standards.

| | | | |

How to Read the Data List

This data list is described with the following format.

Example: For Digital Input Units

| | | | Unit co | nfiguratio | on data | 1 | | | | Sumn | nary spec | cification | s |
|-------|---|---|-------------------------------|---|-------------------|---------------|-------------------------------|------------------------------|--------------------------------|--------------------------------|--------------------------------|-------------------------------------|-----------------------------|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | Input cur- rent [mA] | I/O power sup- ply metho d | Wei ght [g] | Width [mm] | I/O data size [byte] | Number of I/O entry mappings | Num ber of poin ts | Intern al I/O comm on | Rated input volt- age | I/O refres hing metho d | ON/OFF respons e time |
| | | | | | | | | | | | | | |

The items for this format are explained below.

Unit Configuration Data

The Unit configuration data is the required data to create the Unit configuration of Slave Terminal.

Create the Unit configuration so that the total value of the data for which the maximum value is defined does not exceed the maximum value of the Slave Terminal.

Refer to the user's manual for the Communications Coupler Unit on the maximum value for each data.

| Item | Description |
|---------------------------|---|
| NX Unit power consumption | The power consumption of the NX Unit power supply of the Unit. |
| Current consumption from | The current consumption from I/O power supply of the Unit. |
| I/O power supply | The load current of any external connection load, the input current of the Input Units, and the current consumption of any connected external devices are not included. |
| Input current | The input current of the Unit at the rated voltage. |
| | Only the DC Input Units and AC Input Units have this item. |
| I/O power supply method | The method for supplying I/O power supply for the Unit. |
| | The supply method depends on each Unit. |
| | The power is supplied from the NX bus or the external source. |
| | |
| | NX bus: Supply from the NX bus |
| | External: Supply from external source |
| | The Communications Coupler Unit and the Additional I/O Power Supply Unit do not have this item. |
| Weight | The weight of the Unit. |
| Width | The width of the Unit. The unit is "mm". |
| I/O data size | The I/O data size of default value that the Unit consumes. The unit is byte. |
| | However, the unit is bit for some Digital I/O Units. In this case, the unit is given in the table. |
| | It is described according to the input/output sequence. |
| Number of I/O entry map- | The number of I/O entry mappings of default value that the Unit consumes. |
| pings | It is described according to the input/output sequence. |

Summary Specifications

The summary specifications of the Units to configure the Slave Terminal.

Use this as a guide to select the Unit model when you consider the Unit configuration.

The items in the Summary Specifications depend on the Unit type. The meaning of each item is explained for each Unit type.

Communications Coupler Units 1-2

The following shows the Communications Coupler Units data.

1-2-1 **EtherCAT Coupler Unit**

Items in the Summary Specifications

| Item | Description |
|----------------------------|---|
| Rated power supply voltage | The rated voltage that is supplied to the Unit. |
| NX Unit power supply | The amount of power that the Unit can supply to the NX Units. |
| capacity | |

| | | Unit co | nfigurati | on data | | | Summary specifications | | | | |
|-----------|---|---|----------------|---------------|-------------------------------|------------------------------|---------------------------------|----------------------------------|--|--|--|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | Weigh t [g] | Width [mm] | I/O data size [byte] | Number of I/O entry mappings | Rated power supply volt- age | NX Unit power supply capacity *1 | | | |
| NX-ECC201 | 1.45 | 10 | 150 | 46 | 34/0 | 2/0 | 24 VDC | 10 W max. | | | |
| NX-ECC202 | 1.43 | 10 | 130 | 40 | 34/0 | 2/0 | 24 VDC | 10 W IIIax. | | | |

^{*1.} The NX Unit power supply capacity is restricted by the temperature or installation orientation. For details, refer to A-1 NX Unit Power Supply Capacity on page A-2.

1-3 Digital I/O Units

The following shows the Digital I/O Units data.

1-3-1 Digital Input Units

DC Input Units (Screwless Clamping Terminal Block, 12 mm Width)

• Items in the Summary Specifications

| Item | Description |
|-----------------------|---|
| Number of points | The number of input points provided by the Unit. |
| Internal I/O common | The polarity of the input devices that are connected to the Unit. |
| | NPN connection and PNP connection are available. |
| Rated input voltage | The rated input voltage of the Unit. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing, synchronous I/O refreshing and input refreshing with input changed time are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |
| | Changed time: Input refreshing with input changed time |
| ON/OFF response time | The delay time for which the status change of the input terminals reaches the internal circuit of the Unit. |
| | The input filter time is not included. |
| | It is described according to the ON/OFF sequence. |

DC Input Units (MIL Connector, 30 mm Width)

• Items in the Summary Specifications

| Item | Description |
|-----------------------|---|
| Number of points | The number of input points provided by the Unit. |
| Internal I/O common | The polarity of the input devices that are connected to the Unit. |
| | NPN connection and PNP connection are available. |
| Rated input voltage | The rated input voltage of the Unit. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing, synchronous I/O refreshing and input refreshing with input changed time are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |
| | Changed time: Input refreshing with input changed time |
| ON/OFF response time | The delay time for which the status change of the input terminals reaches the internal circuit of the Unit. |
| | The input filter time is not included. |
| | It is described according to the ON/OFF sequence. |

| | | | Unit co | nfiguratio | n data | | | | Summary specifications | | | | | |

| NX-IA3117 | 0.50 | No consumption | 9 (200 VAC/50 Hz) 11 (200 VAC/60 Hz) | Exter- nal | 60 | 12 | 4/0 bits | 1/0 | 4 point s | No polar- ity | 200 to 240 VAC | Free | 10/40 ms max. | | |

1-3-2 Digital Output Units

Transistor Output Units (Screwless Clamping Terminal Block, 12 mm Width)

• Items in the Summary Specifications

| Item | Description |
|-----------------------|---|
| Number of points | The number of output points provided by the Unit. |
| Internal I/O common | The polarity of the input devices that are connected to the Unit. |
| | NPN connection and PNP connection are available. |
| Maximum load current | The maximum output load current of the Unit. Specifications for each output point and for the Unit are described. |
| Rated voltage | The rated output voltage of the Unit. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing, synchronous I/O refreshing and output refreshing with specified time stamp are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |
| | Specified time: Output refreshing with specified time stamp |
| ON/OFF response time | The delay time for which data in the internal circuit is reflected in the state of output elements of the Unit. |
| | It is described according to the ON/OFF sequence. |

| | Unit configuration data | | | | | | | | Summary specifications | | | | | | |
|-----------|---|---|--|-------------------|-------------------|-------------------------------|---|---------------------------------|----------------------------------|--------------------------------------|------------------|-------------------------------------|------------------------|--|--|

Relay Output Units (Screwless Clamping Terminal Block, 12 mm Width)

• Items in the Summary Specifications

| Item | Description |
|-----------------------|---|
| Number of points | The number of output points provided by the Unit. |
| Relay type | The type of relay that is connected to the Unit. |
| | There are N.O. and N.O. + N.C. |
| Maximum switching | The maximum value of switchable current of the relay that is connected to the Unit. |
| capacity | |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing and synchronous I/O refreshing are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |
| ON/OFF response time | The delay time for which data in the internal circuit is reflected in the state of output elements of the Unit. |
| | It is described according to the ON/OFF sequence. |

| | Unit configuration data | | | | | | | | Summary specifications | | | | | |

| NX-OC2733 | 0.95 | | | 70 | | | | pen- dent con- tacts | N.O. + N.C. | | | | | |

1-3-3 Digital Mixed I/O Units

DC Input/Transistor Output Units (MIL Connector, 30 mm Width)

• Items in the Summary Specifications

| Item | Description | | | | | | | | |
|-----------------------|--|--|--|--|--|--|--|--|--|
| Number of points | The number of output and input points provided by the Unit. It is described in the order of output and input. | | | | | | | | |
| Internal I/O common | The polarity of the output and input devices that are connected to the Unit. | | | | | | | | |
| | NPN connection and PNP connection are available. It is described in the order of output and input. | | | | | | | | |
| Rated input voltage | The maximum output load current of the Unit. | | | | | | | | |
| | Specifications for each output point and for the Unit are described. | | | | | | | | |
| Rated voltage | The rated output voltage and rated input voltage of the Unit. It is described in the order of output and input. | | | | | | | | |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. | | | | | | | | |
| | Free-Run refreshing, synchronous I/O refreshing, output refreshing with specified time stamp and input refreshing with input changed time are available. | | | | | | | | |
| | In this table, the following abbreviations are used. | | | | | | | | |
| | Free: Free-Run refreshing | | | | | | | | |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing | | | | | | | | |
| | Specified time: Output refreshing with specified time stamp | | | | | | | | |
| | Input changed time: Input refreshing with input changed time | | | | | | | | |
| ON/OFF response time | For outputs, the delay time for which data in the internal circuit is reflected in the state of output elements of the Unit. For inputs, the delay time for which the status change of the input terminals reaches the internal circuit of the Unit. | | | | | | | | |
| | The input filter time is not included. | | | | | | | | |
| | The ON/OFF delay time is described in the order of output and input. | | | | | | | | |

| | Unit configuration data | | | | | | | | Summary specifications | | | | | | |
|-------------|---|--|------------------------------|--|----------------|-------------------|-----------------------------------|--|-------------------------------|------------------------------------|--------------------------------------|----------------------------------|---|--|--|
| Model | NX Unit power con- sump- tion [W] | Current consumption from I/O power sup- ply [mA] | Input curre nt [mA] | I/O pow er supp ly meth od | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Num ber of I/O entry map- ping s | Num- ber of points | Inter- nal I/O com- mon | Maxi- mum load cur- rent | Rated volt- age | I/O refre shin g meth od | ON/OF F respo nse time | |

| NX-MD6256-5 | 0.75 | 40 | | | 110 | | | | | PNP, for both NPN/P NP | | 24 VDC, 24 VDC | | 0.5/1.0 ms max., 20/400 µs max. | |

1-4 Analog I/O Units

The following shows the Analog I/O Units data.

1-4-1 Analog Input Units

Analog Input Units (Screwless Clamping Terminal Block, 12 mm Width)

• Items in the Summary Specifications

| Item | Description | | | | | | | | | | | |
|-----------------------|---|--|--|--|--|--|--|--|--|--|--|--|
| Number of points | The number of analog input points provided by the Unit. | | | | | | | | | | | |
| Input range | The input range of the Unit. | | | | | | | | | | | |
| Resolution | The resolution of converted values of the Unit. | | | | | | | | | | | |
| Input method | The analog signal input method provided by the Unit. Single-ended input and differential input are available. | | | | | | | | | | | |
| | his table, the following abbreviations are used. | | | | | | | | | | | |
| | Single: Single-ended input | | | | | | | | | | | |
| | Diff: Differential input | | | | | | | | | | | |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. | | | | | | | | | | | |
| | Free-Run refreshing and synchronous I/O refreshing are available. | | | | | | | | | | | |
| | In this table, the following abbreviations are used. Free: Free-Run refreshing | | | | | | | | | | | |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing | | | | | | | | | | | |
| Conversion time | The time required per input to convert analog input signals of the Unit to the converted values. | | | | | | | | | | | |

| | | Unit | config | uration | data | | | | Summary specifications | | | | | |
|-----------|---|---|---|-------------------|-------------------|-----------------------------------|---|--------------------------------|------------------------|-----------------|---------------------|-------------------------------------|------------------------|--|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | I/O pow er sup- ply met hod | Wei ght [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Num ber of poin ts | Input range | Reso- lution | Input meth od | I/O refresh ing metho d | Conver sion time | |
| NX-AD2203 | 0.90 | No con- sumption | NX bus | 70 | 12 | 4/0 | 1/0 | 2 point | 4 to 20 mA | 1/ 8000 | Sin- gle | Free | 250 μs | |

| NX-TS2101 | 0.90 | No con- sumption | No sup- | 70 | 12 | 4/0 | 1/0 | 2 point | Thermo- couple | 250 ms | 0.1°C max. *1 | Free |
| NX-TS2102 | 0.80 | | ply | | | | | S | | 10 ms | 0.01°C max. | |
| NX-TS2104 | | | | | | 8/0 | | | | 60 ms | 0.001°C max. | |
| NX-TS2201 | 0.90 | | | | | 4/0 | | | Resis- tance ther- mometer | 250 ms | 0.1°C max. | |
| NX-TS2202 | 0.75 | | | | | | | | Resis- tance ther- mometer | 10 ms | 0.01°C max. | |
| NX-TS2204 | | | | | | 8/0 | | | Resis- tance ther- mometer | 60 ms | 0.001°C max. | |

^{*1.} The resolution is 0.2°C max. when the input type is R, S, or W.

Temperature Input Units (Screwless Clamping Terminal Block, 24 mm Width)

• Items in the Summary Specifications

| Item | Description | | | | | | | | | |
|-----------------------|---|--|--|--|--|--|--|--|--|--|
| Number of points | The number of temperature input points provided by the Unit. | | | | | | | | | |
| Input type | The temperature input type of the Unit. | | | | | | | | | |
| Conversion time | The time required to convert temperature input signals of the Unit to temperature data. | | | | | | | | | |
| Resolution | The resolution of the measured values for the Unit. It is defined in °C. | | | | | | | | | |
| I/O refreshing method | he I/O refreshing methods that are used by the Unit. | | | | | | | | | |
| | Only Free-Run refreshing method is available. | | | | | | | | | |
| | | | | | | | | | | |
| | In this table, the following abbreviation is used. | | | | | | | | | |
| | Free: Free-Run refreshing | | | | | | | | | |

| | | Unit | t config | uration | data | | | | Sumi | nary specif | ications | |
|-----------|---|---|---|-------------------|-------------------|-----------------------------------|---|--------------------------------|----------------------------------|-------------------------|-----------------|---------------------------------|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | I/O pow er sup- ply met hod | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Num ber of poin ts | Input type | Conver- sion time | Resolu- tion | I/O refreshin g method |
| NX-TS3101 | 1.30 | No con- sumption | No sup- | 140 | 24 | 8/0 | 1/0 | 4 point | Thermo- couple | 250 ms | 0.1°C *1 | Free |
| | | Sumption | sup- | | | | | | couple | | max. *1 | |
| NX-TS3102 | 1.10 | | ply | | | | | S | | 10 ms | 0.01°C max. | |
| NX-TS3104 | 1 | | | | | 16/0 | | | | 60 ms | 0.001°C | |
| | | | | | | | | | | | max. | |
| NX-TS3201 | 1.30 | | | | | 8/0 | | | Resis- | 250 ms | 0.1°C | 1 |
| | | | | | | | | | tance ther- mometer | | max. | |
| NX-TS3202 | 1.05 | | | 130 | | | | | Resis- tance ther- mometer | 10 ms | 0.01°C max. | |
| NX-TS3204 | | | | | | 16/0 | | | Resis- tance ther- mometer | 60 ms | 0.001°C max. | |

^{*1.} The resolution is 0.2°C max. when the input type is R, S, or W.

Position Interface Units 1-5

The following shows the Position Interface Units data.

Incremental Encoder Input Units 1-5-1

Items in the Summary Specifications

| Item | Description |
|----------------------------|--|
| Number of channels | The number of encoder input channels of the Unit. |
| Number of external inputs | The number of external inputs of the Unit. |
| Maximum response frequency | The maximum frequency of the encoder input. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing and synchronous I/O refreshing are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |

| | | Uı | nit configu | ration c | lata | | | | Summa | ry specifica | tions | |
|-----------|---|---|----------------------------------|-------------------|-------------------|-------------------------------|------------------------------|------------------------------|--------------------------------------|---|-------------------------------------|---------------|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | I/O power supply method | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Number of I/O entry mappings | Number of channel s | Number of exter- nal inputs | Maxi- mum respons e fre- quency | I/O refresh ing metho d | Remar ks |
| NX-EC0112 | 0.85 | 0 | NX bus | 70 | 12 | 18/4 | 1/1 | 1 (NPN) | 3 (NPN) | 500 kHz | Sync | 24 V |
| NX-EC0122 | 0.95 | | | | | | | 1 (PNP) | 3 (PNP) | | | voltage input |
| NX-EC0132 | 0.95 | 30 ^{*1} | | 130 | 24 | 18/4 | 1/1 | 1 | 3 (NPN) | 4 MHz | | Line |
| NX-EC0142 | 1.05 | | | | | | | | 3 (PNP) | | | receive |
| | | | | | | | | | | | | r input |
| NX-EC0212 | 0.85 | 0 | | 70 | 12 | 36/8 | 2/2 | 2 (NPN) | None | 500 kHz | | 24 V |
| NX-EC0222 | 0.95 | | | | | | | 2 (PNP) | | | | voltage input |

^{*1.} When you use the 5-V power supply for an encoder, be sure to include that current too. Refer to the NX-series Position Interface Units User's Manual (Cat. No. W524-E1-04 or later) for information on how to convert a 5-V power supply current consumption to a 24-V power supply current consumption.

1-5-2 SSI Input Units

• Items in the Summary Specifications

| Item | Description |
|---------------------------|---|
| Number of channels | The number of SSI communications channels of the Unit. |
| Number of external inputs | The number of external inputs of the Unit. |
| Maximum baud rate | The maximum baud rate (Maximum frequency of synchronous clock) that you can use for SSI communications. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Free-Run refreshing and synchronous I/O refreshing are available. |
| | In this table, the following abbreviations are used. |
| | Free: Free-Run refreshing |
| | Sync: Switching synchronous I/O refreshing and Free-Run refreshing |

| | | Unit | config | Summary specifications | | | | | | | |
|-----------|---|---|---|------------------------|-------------------|-----------------------------------|---|--------------------------|---------------------------------|------------------------------|-----------------------------|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | I/O pow er sup- ply met hod | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Number of channels | Number of external inputs | Maxi- mum baud rate | I/O refreshing method |
| NX-ECS112 | 0.85 | 20 | NX | 65 | 12 | 10/0 | 1/0 | 1 | None | 2 MHz | Sync |
| NX-ECS212 | 0.90 | 30 | bus | | | 20/0 | 2/0 | 2 | | | |

Pulse Output Units 1-5-3

• Items in the Summary Specifications

| Item | Description |
|----------------------------|---|
| Number of channels | The number of pulse output channels of the Unit. |
| Number of external inputs | The number of external inputs of the Unit. |
| Number of external outputs | The number of external outputs of the Unit. |
| Maximum pulse out- | The maximum pulse output speed. |
| put speed | |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Only synchronous I/O refreshing method is available. |
| | |
| | In this table, the following abbreviation is used. |
| | Sync: Synchronous I/O refreshing |

| | | Unit | config | uration | data | | | Summary specifications | | | | | |
|-----------|---|---|---|-------------------|-------------------|-----------------------------------|---|-------------------------------|--|--|---|-------------------------------------|---------------|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | I/O pow er sup- ply met hod | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Numb er of chann els | Numb er of exter- nal inputs | Numb er of exter- nal out- puts | Maxi- mum pulse out- put speed | I/O refresh ing metho d | Remar ks |
| NX-PG0112 | 0.80 | 20 | NX bus | 70 | 12 | 18/ 14 | 1/1 | 1 (NPN) | 2 (NPN) | 1 (NPN) | 500 kHz | Sync | Open collecto |
| NX-PG0122 | 0.90 | | | | | | | 1 (PNP) | 2 (PNP) | 1 (PNP) | | | r output |

1-6 System Units

The following shows the System Units data.

1-6-1 Additional NX Unit Power Supply Unit

• Items in the Summary Specifications

| Item | Description |
|----------------------|---|
| Rated power supply | The rated voltage that is supplied to the Unit. |
| voltage | |
| NX Unit power supply | The amount of power that the Unit can supply to the NX Units. |
| capacity | |

| | | Un | it config | uration | data | | | Summary specifications | | |
|-----------|---|---|-----------|-------------------|-------------------|-------------------------------|---|------------------------------------|---------------------------------|--|
| Model | NX Unit power con- sump- tion [W] | NX Unit power consumption [W] Current consumption from r su l/O power supply me [mA] | | Weig ht [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Rated power supply volt- age | NX Unit power supply capacity*1 | |
| NX-PD1000 | 0.45 | No con- | No | 65 | 12 | 0/0 | 0/0 | 24 VDC | 10 W | |
| | | sumption | supply | | | | | | | |

^{*1.} The NX Unit power supply capacity is restricted by the temperature or installation orientation. For details, refer to A-1 NX Unit Power Supply Capacity on page A-2.

1-6-2 **Additional I/O Power Supply Unit**

• Items in the Summary Specifications

| Item | Description |
|-------------------------------------|--|
| Rated power supply voltage | The rated voltage of the I/O power supply that is supplied to the Unit. |
| Maximum current of I/O power supply | The maximum value of the current that can be supplied to the NX Units from the I/O power supply to be connected to the Unit through the NX bus connectors. |

Data List

| | | Unit c | onfigurat | ion data | 1 | | Summary specifications | | | |
|-----------|---|---|----------------|-------------------|-------------------------------|------------------------------|---------------------------------|-------------------------------------|--|--|
| Model | NX Unit power con- sump- tion [W] | Current consump- tion from I/O power supply [mA] | Weigh t [g] | Widt h [mm] | I/O data size [byte] | Number of I/O entry mappings | Rated power supply volt- age | Maximum current of I/O power supply | | |
| NX-PF0630 | 0.45 | 10 | 65 | 12 | 0/0 | 0/0 | 5 to 24 VDC | 4 A | | |
| NX-PF0730 | | | | | | | | 10 A | | |

I/O Power Supply Connection Unit 1-6-3

• Items in the Summary Specifications

| Item | Description |
|---|--|
| Number of I/O power | The type (IOV/IOG) and number of I/O power supply terminals of the Unit. |
| supply terminals | |
| Current capacity of I/O power supply terminal | The current capacity of the I/O power supply terminals of the Unit. |

| | | Ur | nit configu | ıration | data | | | Summary | specifications |
|-----------|---|----------|--------------------------------------|-------------------|-------------------|-------------------------------|---|--|---|
| Model | NX Unit power consumption [W] Current consumption from I/O power supply [mA] | | I/O power supply metho d | Wei ght [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Number of I/O power supply termi- nals | Current capacity of I/O power supply terminal |
| NX-PC0020 | 0.45 | No con- | NX bus | 65 | 12 | 0/0 | 0/0 | IOV: 16 terminals | 4 A/terminal |
| NX-PC0010 | | sumption | | | | | | IOG: 16 terminals | |
| NX-PC0030 | | | | | | | | IOV: 8 terminals IOG: 8 terminals | |
| | | | | | | | | iog. o terminais | |

1-6-4 Shield Connection Unit

• Items in the Summary Specifications

| Item | Description |
|-----------------------|---|
| Number of shield ter- | The number of terminals of the SHLD terminal of the Unit. |
| minals | |

| | | Un | it config | uration | data | | | Summary specifications |
|----------|---|----------|--|-------------------|-------------------|-------------------------------|--|----------------------------|
| Model | power tion from r consump- I/O power tion [W] supply [mA] | | I/O powe r sup- ply meth od | Wei ght [g] | Widt h [mm] | I/O data size [byte] | Number of I/O entry map- pings | Number of shield terminals |
| NX-TBX01 | 0.45 | No con- | No | 65 | 12 | 0/0 | 0/0 | 14 terminals |
| | | sumption | supply | | | | | |

1-7 **Safety Control Units**

The following shows the Safety Control Units data.

Safety CPU Unit 1-7-1

• Items in the Summary Specifications

| Item | Description |
|-------------------------------------|--|
| Maximum number of | This is the number of safety I/O points that the Unit can control. |
| safety I/O points | |
| Program capacity | This is the capacity of the user program in the Unit. |
| Number of safety master connections | This is the number of safety master connections that the Unit can have through Safety over Ether-CAT (FSoE). |
| | You can connect one Safety I/O Unit for each safety master connection. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Only Free-Run refreshing method is available. |
| | |
| | In this table, the following abbreviation is used. |
| | Free: Free-Run refreshing |

| | | Uni | it config | uration | data | | | | Summary sp | ecifications | |
|-----------|---|---|--|-------------------|-------------------|-------------------------------|---|--|---------------------|--|------------------------------|
| Model | NX Unit power consumptio n [W] | Curre nt consu mptio n from l/O power supply [mA] | I/O powe r sup- ply meth od | Wei ght [g] | Widt h [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Maximum number of safety I/O points | Program capacity | Number of safety master connecti ons | I/O refreshin g method |
| NX-SL3300 | 0.90 | No con- sump- | No supply | 75 | 30 | 0/0 to 512/ 512 | 2/2 | 256 points | 512 KB | 32 | Free |
| NX-SL3500 | | tion | | | | 0/0 to 1024/ 1024 | | 1024 points | 2048 KB | 128 | |

1-7-2 Safety Input Units

• Items in the Summary Specifications

| Item | Description |
|------------------------------|--|
| Number of safety | This is the number of safety input points on the Unit. |
| input points | |
| Number of test output points | This is the number of test output points on the Unit. The test output points are used with the safety input terminals. |
| Internal I/O common | This is the polarity that the Unit uses to connect to input devices. There are |
| | |
| | models with NPN and PNP connections. |
| Rated input voltage | This is the rated input voltage of the Unit. |
| OMRON Special | This tells whether the Unit supports the connection of OMRON Special Safety Input Devices (D40A |
| Safety Input Devices | Non-contact Door Switches, E3FS Single Beam Safety Sensors, etc.). |
| | In this table, the following abbreviations are used. |
| | Yes: Can be connected |
| | No: Cannot be connected |
| Number of safety | This is the number of safety slave connections that the Unit can have through Safety over Ether- |
| slave connections | CAT (FSoE). You can connect to one Safety CPU Unit for each safety slave connection. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Only Free-Run refreshing method is available. |
| | |
| | |
| | In this table, the following abbreviation is used. |
| | Free: Free-Run refreshing |

| | | | Unit | configu | ration | data | | | Summary specifications | | | | | | |
|-----------|--|---|-------------------------------|--|-------------------|---------------|-------------------------------|---|--|---|--------------------------------|----------------------|--|---|-------------------------------------|
| Model | NX Unit power consu mptio n [W] | Curre nt consu mptio n from I/O power supply [mA] | Input cur- rent [mA] | I/O powe r sup- ply meth od | Weig ht [g] | Width [mm] | I/O data size [byte] | Num- ber of I/O entry map- pings | Numb er of safety input point s | Numb er of test outpu t point s | Intern al I/O comm on | Rated input voltag e | OMR ON Speci al Safet y Input Devic es | Numb er of safety slave conne ctions | I/O refres hing metho d |
| NX-SIH400 | 0.70 | 20 | 4.5 | NX bus | 70 | 12 | 8/8 | 2/2 | 4 point s | 2 point s | PNP | 24 VDC | Yes | 1 | Free |
| NX-SID800 | 0.75 | | 3.0 | | | | 10/ 10 | | 8 point s | | | | No | | |

1-7-3 **Safety Output Units**

• Items in the Summary Specifications

| Item | Description |
|------------------------------------|--|
| Number of safety output points | This is the number of safety output points on the Unit. |
| Internal I/O common | This is the polarity that the Unit uses to connect to input devices. There are models with NPN and PNP connections. |
| Maximum load current | This is the maximum load current for outputs on the Unit. A specification is given for each output and each Unit. |
| Rated voltage | This is the rated voltage of the outputs on the Unit. |
| Number of safety slave connections | This is the number of safety slave connections that the Unit can have through Safety over Ether-CAT (FSoE). You can connect to one Safety CPU Unit for each safety slave connection. |
| I/O refreshing method | The I/O refreshing methods that are used by the Unit. |
| | Only Free-Run refreshing method is available. |
| | In this table, the following abbreviation is used. |
| | Free: Free-Run refreshing |

| | Unit configuration data | | | | Summary specifications | | | | | | | | |
|-----------|---|---|---|----------------|------------------------|-------------------------------|------------------------------|---|--------------------------------|---|----------------------|---|-------------------------------------|
| Model | NX Unit power consumpt ion [W] | Current consu mption from I/O power supply [mA] | I/O powe r sup- ply meth od | Weig ht [g] | Width [mm] | I/O data size [byte] | Number of I/O entry mappings | Numb er of safety outpu t point s | Intern al I/O com mon | Maximu m load current | Rated volta ge | Numbe r of safety slave connec tions | I/O refresh ing metho d |
| NX-SOD400 | 0.75 | 60 | NX bus | 65 | 12 | 8/8 | 2/2 | 4 points | PNP | 0.5 A/ point, 2 A/ Unit | 24 VDC | 1 | Free |
| NX-SOH200 | 0.70 | 40 | | | | | | 2 points | | 2.0 A/ point, 4.0 A/Unit at 40°C, 2.5 A/Unit at 55°C | | | |

Appendices

This section describes NX Unit power supply capacity.

A-2 List of Screwless Clamping Terminal Block Models

This section explains how to read the Screwless Clamping Terminal Block model numbers and shows the Screwless Clamping Terminal Block models that are applicable to each Unit.

A-2-1 Model Notation

The Screwless Clamping Terminal Block models are assigned based on the following rules.

A-2-2 List of Terminal Block Models

The following table shows a list of Screwless Clamping Terminal Blocks.

| Terminal Block model | Number of terminals | Ground terminal | Terminal current capacity |
|----------------------|---------------------|-----------------|---------------------------|
| NX-TBA081 | 8 | Not provided | 4 A |
| NX-TBA121 | 12 | | |
| NX-TBA161 | 16 | | |
| NX-TBB121 | 12 | | |
| NX-TBB161 | 16 | | |
| NX-TBA082 | 8 | | 10 A |
| NX-TBA122 | 12 | | |
| NX-TBA162 | 16 | | |
| NX-TBB122 | 12 | | |
| NX-TBB162 | 16 | | |
| NX-TBC082 | 8 | Provided | |
| NX-TBC162 | 16 | | |

Note When you purchase a Terminal Block, purchase an NX-TB \square \square 2.

A-2-3 Applicable Screwless Clamping Terminal Blocks for Each Unit Model

The following indicates the Screwless Clamping Terminal Blocks that are applicable to each Unit.

| Unit model num- | Terminal Block | | | | | | | |
|-----------------|---------------------------|---------------------|----------------------|--------------------|--|--|--|--|
| ber | Model | Number of terminals | Ground terminal | Current capacity | | | | |
| NX-ECC201 | NX-TBA081 | 8 | Not provided | 4 A | | | | |
| | NX-TBC082 | | Provided | 10 A | | | | |
| NX-ECC202 | NX-TBC082 | | | 10 A | | | | |
| NX-ID3□□□ | NX-TBA121 | 12 | Not provided | 4 A | | | | |
| | NX-TBA122 | | | 10 A | | | | |
| NX-ID4□□□ | NX-TBA161 | 16 | | 4 A | | | | |
| | NX-TBA162 | | | 10 A | | | | |
| NX-ID5□□□ | NX-TBA161 | | | 4 A | | | | |
| | NX-TBA162 | | | 10 A | | | | |
| NX-IA3117 | NX-TBA081 | 8 | = | 4 A | | | | |
| | NX-TBA082 | | | 10 A | | | | |
| NX-OD2□□□ | NX-TBA081 | | | 4 A | | | | |

Precautions for Correct Use

You can mount either NX-TB \square \square 1 or NX-TB \square \square 2 Terminal Blocks to the Units that the current capacity specification of the terminals is 4 A or less.

However, even if you mount the NX-TB $\square\square$ 2 Terminal Block, the current specification does not change because the current capacity specification of the terminals on the Units is 4 A or less.

A-3 Version Information

This section describes the relationship between the unit versions of the NX Units, Communications Coupler Units and CPU Units, and the versions of the Sysmac Studio, and the specification changes for each unit version of each Unit.

A-3-1 Relationship between Unit Versions of NX Units, Communications Coupler Units and CPU Units, and Versions of Sysmac Studio

The relationship between the unit versions of each Unit and the Communications Coupler Units, CPU Units, and Sysmac Studio versions are shown below.

With the combinations of the unit versions/versions shown below, you can use all the functions that are supported by each unit version of each Unit model.

Use the unit versions/versions that correspond to the NX Unit models and the unit versions or the later/higher versions.

You cannot use the specifications that were added or changed for the relevant NX Unit models and the unit versions unless you use the corresponding unit versions/versions.

Refer to the user's manuals for the specific Units for the functions that were added or changed for each unit version update of the Communications Coupler Units or NX Units.

Refer to A-3-2 Support Functions of the Communications Coupler Units and Restrictions on the NX Units on page A-13 for information on the relationship between the support functions of the Communications Coupler Units and restrictions on the NX Units.

Model : Model numbers of NX Units.
Unit Version : Unit versions of NX Units.

EtherCAT Communications Coupler Units : Unit versions of EtherCAT Coupler Units, NX-ECC201 and

NX-ECC202, which are compatible with the NX Units.

CPU Units : Unit versions of NJ-series CPU Units, NJ501-□□□□ and

NJ301- $\square\square\square\square$, which are compatible with the EtherCAT

Coupler Unit.

Sysmac Studio : Sysmac Studio versions that are compatible with the Ether-

CAT Coupler Unit.

| NX-SOD400 | | | | | |
| NX-SOH200 | | | | | |

^{*1.} Depending on the type of Unit, some models do not have all of the versions given in the above table. For those models, the oldest version applies. The oldest version means the oldest of the versions or the later versions given in the above table. Refer to the relevant user's manuals for specific Units for details on the relationship between models and versions.

A-3-2 Support Functions of the Communications Coupler Units and Restrictions on the NX Units

Some functions that were added or changed for each unit version of the Communications Coupler Units are restricted depending on the models of the NX Units and unit versions.

The following is a list of restrictions on NX Units for the functions.

Refer to the user's manual of the Communications Coupler Unit for details on the functions listed below.

EtherCAT Coupler Units

| Function Change or addition | | Models of NX Units and unit versions | | | | | | |
|--|---|--------------------------------------|--|---|---------------------------------|--------------------------------|--------------------|----------------------------|
| | | | Digital I/O Units | Analog Input Units/Anal og Out- put Units | Tempera- ture Input Units | Position Interface Units | System Units | Safety Control Units |
| Restarting | Restarting a specified NX Unit *1 | Addition | Ver.1.0 | Ver.1.0 | Ver.1.1 | Ver.1.1 | Ver.1.0 | Not sup- ported |
| I/O checking | | Addition | Ver.1.0 | Ver.1.0 | Ver.1.0 | Ver.1.0 *2 | Ver.1.0 | Not sup- ported |
| Monitoring total power-ON time | | Addition | Ver.1.0 | Ver.1.0 | Ver.1.1 | Ver.1.1 | Ver.1.0 | Not sup- ported |
| Restarting after Clear All Memory operation | Restarting only the specified NX Unit after performing the Clear All Memory operation for a specified NX Unit | Change | Ver.1.0 | Ver.1.0 | Ver.1.1 | Ver.1.1 | Ver.1.0 | Not sup- ported |
| Restarting after transferring Unit operation set- tings | Restarting the NX Unit to which the Unit operation settings were transferred when you transfer the settings to a specified NX Unit *2 | Change | Ver.1.0 | Ver.1.0 | Ver.1.1 | Ver.1.1 | Ver.1.0 | Not sup- ported |
| I/O refreshing method | Time stamp refreshing *3 Input refreshing with input changed time Output refreshing with specified time stamp | Addition | Model on time stamp refreshing Ver.1.0 | Not sup- ported | Not sup- ported | Not sup- ported | Not sup- ported | Not sup- ported |

^{*1.} A CPU Unit with unit version 1.07 or later is required to specify an NX Unit with the restart instruction. If you do not specify an NX Unit with the restart instruction, you can use version 1.05. Refer to the *NJ-series Instructions Reference Manual* (Cat. No. W502-E1-09 or later) for details on specifying an NX Unit with the restart instruction.

^{*2.} When the MC Function Module is used, use the MC Test Run and axis status monitor (MC monitor table) functions of the Sysmac Studio to check the wiring.

^{*3.} The instructions for time stamp refreshing are supported by CPU Units with unit version 1.06 or later. If you do not use instructions for time stamp refreshing, you can use version 1.05. Refer to the *NJ-series Instructions Reference Manual* (Cat. No. W502-E1-08 or later) for details on the instructions for time stamp refreshing.
